# A Window to High Design

Customizable products in various styles and finishes make Pella the right choice for those with an eye for design—and a passion for connecting families to their communities.

**M**arried designer-developers Harvi Sahota and Anna Lowder transformed a blank canvas of land in Montgomery, Alabama, into Hampstead: a 416-acre mixed-use development and this year's *Southern Living* Inspired Community. Complete with a lake, farm, and lots of Southern charm, Hampstead's setting inspired developers to incorporate large windows that bridge beautiful interiors with picturesque surroundings. The Pella® 450 Series casement windows on the Inspired Home elevate the design by illuminating each room with natural light, creating calm, serene spaces. Pella windows exemplify the combination of traditional Southern style and modern sensibility that drove the home's design, and help establish it as a focal point of the community.
